- Stress-free working thanks to the integrated step counter
- Central Combitip ejection
- Step counter: Displays the number of dispensing steps already performed
- Can only be used with Eppendorf Combitips advanced
- Combitip sensor: Automatic Combitip recognition and volume display
- For use with 25 ml or 50 ml Combitips, the appropriate adapter must be ordered at the same time.
- Precise dispensing of viscous solutions (e.g. glycerine) or liquids with high vapour pressure (e.g. ethanol)

Ultrapure water system LaboStar® PRO TWF

- For type I and type III water
- Integrated 7 liter tank
- Withdrawal rate 1.2 l/min

The LaboStar® PRO TWF systems produce ultrapure water straight from your drinking water supply. This equipment incorporates a pre-filtration unit and a reverse osmosis membrane. The pure water collects in an integrated tank and is finally circulated through the polishing module by a circulation pump. A conductivity sensor constantly measures the product water purity in the recirculation loop. A positively charged 0.2 µm sterile filter at the dispenser removes bacteria and endotoxins. The ultrapure water system is supplied with the first set of modules and filters.

- Upgrade with a 30 or 60 L storage tank is possible
- Manual dispense via tap
- Delivers two types of water: type III from the tank and type I from the dispenser
- Easy module change due to quick-fit couplers
